

Keepsake brushes

The tools made in this activity are objects in their own right and, especially with the different colours splatted on them, can be too good to throw away. One way of capturing the tools is to make them into hanging decorations! This is how...

Materials:

- Card
- One sided sticky plastic
- Scissors
- Garden twine/string/raffia/ribbon
- Hole punch

What to do:

Start by selecting the tool (or bit of tool) you would like to keep.

Cut a small piece of card and lay your tool on to it (the card should be a bit bigger than your tool).

Cover these in the plastic, folding the plastic around the back of the card to secure the tool to the card.

Hole punch the top and thread with a piece of garden twine/string/raffia/ribbon and tie to create a loop. Your tool can now be hung up!
